### **DETAILED ACTION**

1. This action is in response to Applicants' paper filed 16 June 2005. Upon reading the amendments and reconsidering the instantly claimed subject matter, the Examiner requires a species election as follows:

#### ***Election/Restrictions***

2. Claims 49-73 are generic to a plurality of disclosed patentably distinct species comprising those sequences encompassed by Formula V (SEQ ID NO: 293) and those individual amino acid sequences in claims 71-73. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
